## Service for CNC milling machines

Whether it's assembly tasks, trainings, maintenance, modifications, repairs, or spare parts for Bornemann and 3rd party milling machines — Our friendly and experienced service staff will help you whatever your requirements are to ensure your production continues to run smoothly, so that the service you receive is the best for human and machine resources.

We are at hand for all sorts of time-consuming, specialist and cumbersome tasks and activities, giving you the peace of mind to concentrate on those areas of expertise that are the most promising for your business.

Every day, everyone in our organisation is to act in a problem-solving capacity for you, our customer — whether it is in direct contact or behind the scenes.

### Training

- ☐ Beginner level
- ☐ Advanced level

The hands-on Bornemann beginner and advanced level trainings for milling machine operators are clearly structured and take place in your familiar production surroundings. You not only save on travel costs but also greatly benefit from the fact that all sorts of

questions arising from topical application cases can be dealt with. This ensures that learning is fun and that your organisation leverages the learned results.

### Servicing

- ☐ Maintenance
- ☐ Storing spare parts

Sophisticated maintenance bundles for operation continuity ensure high availability and productivity of your milling machines as well as steadfast adherence to delivery schedules — with defined maintenance rates for transparent calculable costs.

### Fault clearance

- ☐ Phone hotline
- ☐ Mobile service
- ☐ Spare parts
- ☐ Repairs
- ☐ On-site service

But even in possible problem cases, Bornemann is the right address to turn to: To minimise your machine's downtime we will respond depending on your needs, either by remote diagnosis, delivery of control modules or mechanical spare parts as well as professional

replacement of parts at your premises.

### Modernisation

- ☐ Control system modification
- ☐ Mechanics conversions and expansions

Eventually, it is about time for our CNC experts to regenerate your technology or replace your control system. This will enable your milling machine to meet today's needs of speed, precision, and workpiece surface quality. Our range of services for modernisation of your

milling machine also includes installing a new milling spindle or integrating a further machine axis and many more.

**Do you have any questions about our services? Please call us on +49 (0)5187 94 00 0 or e-mail us at [info@bornemann-mb.de](mailto:info@bornemann-mb.de). We are happy to help you with expert advice.**
